Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I have needed to stop composting due to rats and also the need to protect household pets (my dog almost died from toxicity after eating compost), but now my rubbish fills up ridiculously quick. I would prefer to compost, but personally can't, so would love this collection service
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	Ideally it would include green waste as I have nowhere to put green waste currently, but the main priority for me would be food scraps given they are increasing the household waste and use of rubbish bags
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	I believe that collecting foodscraps will greatly help achieve minimisation targets
What target should we set instead?

What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	A major reason for us getting a green bin is just to throw away the lawn clippings from mowing the lawns. If this was included in the kerbside collection, we wouldn't even need a bin and would be fine with just the red rubbish bags

Are there any comments you'd like to make?	
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	At least food scraps would be great. Whichever is most achievable really, if the combination of the two wastes will make implementation more challenging then I'd be happy with just food waste.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	I currently don't have any issues with waste collection from my perspective. I'm also fine with other options being investigated
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	Recycling education is always welcome! PNCC have had great forms about what can be recycled in the past (what each number means). Something about cleaning recyclable materials would be helpful E.g. some common items than need cleaning and the extent of the cleaning required, what happens to recycling when items aren't cleaned properly. Still feels like there's a lot of misunderstanding regarding cleaning recyclable items.

Are there any comments you'd like to make?	Yes but no info is given here on the how it's going to be done, or is the food/green waste it
What target should we set instead?	
Question 4: Other comments	
	The fee would have to be similar to what I pay now for my green waste bin, which is on a user pays system. Food scrap collection could only be a positive step and I would utilise the service as do have more food waste than I would like.

Are there any comments you'd like to make?	I think it will be more cost effective and beneficial in the long run if we offered a compost bin and education for home composting
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	As most "recycling" only goes into landfill, I feel we should have a rubbish bin and a biodegradable bin ! PNCC should push supermarkets to adopt biodegradable packaging and phase out plastic trays and wrap
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	Leave it to the private sector, if the council tries to do too much it will only raise rates

Are there any comments you'd like to make?	Make it easier for people to do their own compost at home. We do this at our house and only send what we have to to the waste. I don't think we should have to pay for something we won't use.
What should be included in the kerbside collection service?	Neither
Please tell us your thoughts	Doesn't need to be done, encourage composting instead.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	Bins over rubbish bags would be far better. That way people can put their bin out at night and it won't be ripped open like bags can be.

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I think this is a fantastic opportunity for the council as my property is small and I can't really have a compost of my own.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	Love to be able to get my waste collected as well. I lived in Christchurch and this was fantastic all my weeds and lawn clippings went in it.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	I don't know / not sure

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	This would be awesome, we currently have a green waste bin but it would be awesome to have a green waste and food scraps bin service.
What should be included in the kerbside collection service?	Food scraps and green waste

Question 4: Other comments	
	Tauranga has implemented something similar, they have also introduced council rubbish collection, but the downside people that I talk to up there have is, they can't buy council rubbish bags when they have excess waste. If PNCC ever introduced rubbish bins it would be good to keep bags too

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	I don't know / not sure
Are there any comments you'd like to make?	Maybe allow an opt-in version. Majority of people should be composting their organic waste. Council should spend money on getting this message across, maybe some kind of compensation if you do this? For people who can't compost their organic waste, due to space or something, this would be good for them. However it will be an added cost when households are already having to pay higher rates. Not sure of the solution here.

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	If this is implemented it is imperative that the bins are able to have a liner in. Other towns within NZ have this service already and not being able to have a liner in the bin stops households using them due to the smell and cleaning required once the bin is picked up.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	It would have to be a reasonable price to make it worthwhile.
