Your contact details	
First name	Sarah
Last name	Pain
Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	This target is possible as long as appropriate alternative disposal or waste streams are for the diverted waste are fully established.
What target should we set instead?	
Question 4: Other comments

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I am concerned about how much waste ends up altogether that could be better disposed of so think this is a great idea.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	This would allow properties to also be more maintained with this option. We pay to dump but a lot of families cannot afford to do this and then things get illegally dumped.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments

Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	No
Are there any comments you'd like to make?	Refuse collection in Palmerston North is already an unmitigated and pathetic disaster where we all pay multiple times for refuse collection. The standard refuse collection by PNCC is so pathetic most people, after paying PNCC to collect refuse in their rates, then have to contract a third party to provide a proper service by way of wheelie bins. We then pay PNCC to run trucks around town collecting recycling, however the rules around what can be put in the recycling bins are so pathetic that it's unworkable. I don't even use the stupid yellow lid bins now, preferring to put it in the contracted bin. Then we pay for another set of trucks to drive around collecting bottles, but that is also a waste of time given the rules around that. And then typically people will take a load to the refuse centre, paying ridiculous rates to a third party contractor. You can see why people choose to "fly tip" and where once I would have castigated those people when seeing rubbish littering the sides of roads, I can only sympathise with them. PNCC need to get back to basics and provide the necessities properly before laying on additional costly services that will be another failure.
What should be included in the kerbside collection service?	Neither
Please tell us your thoughts	PNCC is not competent to provide such a service. It will be another expensive blow out of a failed service just like our existing refuse collection, and the same as our ridiculous bus service. Not that you will listen nor take notice of what the public are saying because you are all so arrogant and brainwashed by the corrupt global agenda
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	Outsourcing has only ever proven to be a grossly inefficient and costly exercise. PNCC are paid by ratepayers to provide necessary services, and it's about time PNCC focused on actually delivering those basic services and for the first time in a long time, deliver them well!
Question 3: Waste minimisation target	

Do you support our plan to include these performance standards as our waste minimisation target?	No
Are there any comments you'd like to make?	I couldn't give a brass razoo about any of these so called "ministry targets"!! This is not about the environment, it's all about control and imposing ridiculous costs on ratepayers. Hiding behind "ministry targets" is pandering to the govt and global agenda when what PNCC should be doing is representing ratepayers rights along with delivering first class service.
What target should we set instead?	None until you can prove yourselves to be competent
Question 4: Other comments	
	I'm not interested in any council initiative until such time as PNCC find some integrity and deliver on the core services it is supposed to and deliver on them within budget and without the need to impose these disgraceful rates increases.

Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	No
Are there any comments you'd like to make?	I currently compost my own. I would only support it if it was an opt in/out, user pays scenario and not an increase to everyone's rates
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	Not really if it means increasing rates all of the time.
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	I don't know / not sure
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	I believe there should be a tip/green waste pass per year for every rateable residential home to use to reduce the cost of cleaning up the illegal dumping

Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	I support investigation, but reading the subtext behind the question: services that everyone uses should be public-owned and publicly-provided. Moving such services to the private sector might make it more efficient in the short run, but ultimately will result in a situation where capital/technology is moved out of the public sector, and soon public provision is no longer an option. Private sector is concerned about profit and efficiency and does not account for social value or benefit of an economic activity.
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	As someone who has lived in Wellington and had a green waste bin this is a fantastic idea and for those who cant compost on their own section/property it gives us the opportunity to still compost in an alternative Way
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	I don't know / not sure
Are there any comments you'd like to make?	If PNCC provided a wheelie bin service for general waste including the red rubbish bags it would make the service more appealing. At current, I use low cost bins as the price is the lowest on offer, compared to the price of red rubbish bags. However, I would contemplate changing if PNCC started a wheelie bin service
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?

Do you support our plan to include these performance standards as our waste minimisation target?	I don't know / not sure
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	I think it would be great to have recycling as is, green/food waste bins, and wheelie bins for rubbish all under council. It could be semi-user pays like Napier City Council does. Rate payers select the level of services they want and pay accordingly in their rates. Recycling for all and others as options. In Napier rate payers choose weekly or fortnightly rubbish emptying in rates.

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	I don't know / not sure
Are there any comments you'd like to make?	<p>We were part of the trial for the food scraps bin last year. It was good but to be honest we didn't cut down on much waste because we composted before and continued to compost after the trial was over. So by providing the services it just meant our food scraps were being collected by the council rather than going into our home compost bin.</p> <p>I think this could be a great opt in service for those who want it, but there are many households including ourself that already compost and so it is not needed for us and we are already making efforts to minimize waste. The fear will be we will see another rates increase for this service where there are a number of us households who compost food scraps ourselves so won't need the service.</p>
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts

Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I have relocated from New Plymouth and used food scraps bin SUCCESSFULLY for years. New Plymouth had to transport their scraps to Hamilton! Where does Palmerston North recycle these scraps? I have disliked putting food scraps into the red plastic bag! Education on how to use bin is important. Most people recoil at the idea of a dirty, smelly scrap bin. I am a one-person household. I kept my scraps sealed in a 2-litre ice cream in the fridge. When this was full I would wrap the scraps in two pieces of the local free weekly newspaper. I'd usually have two bundles a week. I'd place the bin out weekly. EDUCATE people how this works please. Don't just throw scraps in the bin, leave them for a week and expect the collection person to shake them out of the bin! My bin needed a rinse every few weeks and it was always fresh. It was thrown on berm by the collection person and NPDC came and repaired it. The repair person was impressed with the cleanliness of the bin. EDUCATE people, tell them how to use it, what they can put in the bin. I can't wait for PNCC to provide me with a bin. :)
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	Ideally both. I don't have lawn clippings. But still the food scraps would need to be wrapped. I was told that wrapping food in newspaper was suitable. Most people get a free paper delivered or buy bin liners. Of course, that's not in some people's budget to buy liners. Are you going to ask about garden waste? It would be nice to know what questions are coming up.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	I use the smallest recycling bin. I am very careful about recycling. I know a lot of people are not careful. New Plymouth City Council have an app which details every possible product that can be recycled. Have a look at their app PLEASE? I am a one-person household. Erm, and the cat. I was horrified to start using a red plastic bag, and even more horrified to have to pay \$14.50 for 5 at the supermarket. New Plymouth City Council provided a 240L red bin

192-2

	for general waste weekly; a 240L yellow bin for recycling alternative fortnightly with the blue glass crate; a food scraps bin weekly. This system worked well. All information about address collection on their app (and website too I presume).
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	I don't know / not sure
Are there any comments you'd like to make?	I am not sure what you mean by that question. Yes, we (the public) need to be concerned about waste minimisation. I think this should be a priority provided to rate payers by the council. There should be one FREE curbside free-for-all collection every second year. With council's intention to reduce motor vehicles, how does a carless household get rid of rubbish? I am very surprised I have to pay for red rubbish bags. I only use one of these every 2-3 weeks which I am pleased about.
What target should we set instead?	
Question 4: Other comments	
	I was so grateful to find out I could deliver my bags of garden waste to Mt Cleese. (I am not sure of the name of it). This is a marvellous service for \$5 for what I could put in the boot of my car. Last week there was no-one on duty when I drove through at 9:30am. On my way out there was someone in the office, so I drove around to pay my \$5 and the man told me off. I shouldn't have done that! I didn't expect a free trip! This is an exceptional service offered by PNCC. I have moved into a new home and had a garden tidy up. I'd hate to lose this service. Happy to talk to someone/anyone about the excellent waste collection service provided in New Plymouth.

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	I don't know / not sure
Are there any comments you'd like to make?	Personally, I don't have any problem with food scraps or green waste. Because; I compost my green waste and all my kitchen waste. I don't waste food. All the vege that go bit not fresh- from them I create a recipe and eat it. I shop only what I need. Therefore, in my house I generate very less amount of food scraps go to another bucket and donate to a worm farm. Thinking of having a bakashi bucket in my garden.
What should be included in the kerbside collection service?	Neither
Please tell us your thoughts	Lot of soft plastic come from packaging and recycle bin with cardboard, recycle plastic, and cans.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	I will be supporting If it is environment friendly
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	Again, customer has to buy a separate bag for this waste collection? What are you going to do with large collection of food scraps? What machinery are you going to use for processing? Is it environment friendly? These came to my mind.
What target should we set instead?	
Question 4: Other comments	

	<p>Please pay attention to the amount of soft plastic that goes into the kerbside collection. This will end up in the landfill and stay there forever without degrading and disturbing the environment.</p> <p>PNCC is one of the councils who does not provide a collection center for soft plastic. If you can provide a solution for soft plastic in your waste management plan will be great.</p> <p>Reward the people who compost their own waste.</p>

Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I think that you should be looking at Victoria Australia in what they do with their green waste and food scrap collections. I think this should be a weekly collection using a wheelie bin. I would also prefer this to be commenced earlier than later.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	I think this is a great idea and should be a weekly collection,.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	I think that there are too many private operators. When residing in Victoria Australia they did not have the amount of private companies who did rubbish collections. I think it is important that the service is provided by the council.
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	I think that the council should be the only collector of waste in our council area. This would then decrease waste. I also think you need to look at 6monthly hard waste and an up cycling shop at the recycling centres to keep rubbish that can be recycled and also put that money earned towards the running of these services.
What target should we set instead?	
Question 4: Other comments	
	1. Have only the council supplying waste collection.

195-2

	<ol style="list-style-type: none"><li>2. Have hard waste collections 6monthly</li><li>3. Food and green waste should be a weekly collection</li><li>4. Instead of rubbish bags use wheelie bins.</li><li>5. If people require bigger rubbish bins then they should be charged.</li></ol>

### Submission on the draft Waste Management & Minimisation Plan

Your contact details	
First name	Emma
Last name	Scheltema
Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I think this would be a great option to reduce waste going into landfill. It would be great if a cost breakdown could be given for these options, and even better if the cost could be recovered from reducing waste going to landfill, so there is no extra cost to ratepayers. I personally however would most likely support this move even if the cost is more to the ratepayer.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	Definitely food scraps. Green waste would be excellent however I imagine would require more infrastructure to collect, and there are good options for people to drop off greenwaste already at Awapuni. So if I had to choose one option it would be for food scraps to be prioritised
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	I would like to see Palmerston North adopt options for soft plastic recycling (through Soft Plastic Recycling NZ/Packaging Forum). I understand that local infrastructure is required for the packaging forum to introduce this service,

	<p>and wonder if this is something that the council is able to be involved with. There are many smaller towns supporting this service and I think it would be another beneficial way to reduce waste ending up in landfill.</p>

Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	Consider bins for landfill waste, glass, recycling and green waste.so all properties have bins for each. This will do away with private bins but could take them on as contractors to deliver bins and then do collection of them.

Question 4: Other comments	

### Submission on the draft Waste Management & Minimisation Plan

Your contact details	
First name	Mark
Last name	Styles
Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	I don't know / not sure
Are there any comments you'd like to make?	It depends on what is being proposed and the required funding model. Ratepayers probably wouldn't have the ability to opt-out (of the food scraps collection service), similar to how the current kerbside recycling model is. Another consideration is the number of council recycling bins each property would have in addition to what is being proposed here, alongside any existing subscription bin services households may have.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	A standalone green waste option would be good here. Some people are happy to compost their own food waste (and green waste) at home - they may not wish to pay towards a city-wide collection service.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	Council needs to provide more direct communication and education to households and schools on what can/can't be recycled. The amount of general waste I see in recycling bins out for collection is really disappointing.

202-2

	<p>The current label (underneath the bin lid) that shows what can/can't be recycled is outdated and needs to be refreshed. Council could really take a lead educational role here.</p>

Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	Many homes don't have room for a compost heap.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	This would be a welcome addition to the collection.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	I think providing the services directly is working well.
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	

### Submission on the draft Waste Management & Minimisation Plan

Your contact details	
First name	Michelle
Last name	Forrest
Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	Is there a way to have separate green waste versus food waste? Most of our food waste goes to our compost.
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	I'd love a green waste collection more than food waste.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	I'd happily support a council waste removal if it was a bin and was cheaper than private as well as having the green waste separate. I think most of our bin is green waste
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	Could there be days where you can get your big green waste chipped and get to keep the mulch. Having a private mulcher that can handle big stuff is so expensive but I'd love the mulch for my gardens.

Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	No
Are there any comments you'd like to make?	Only if it was opt-in. I don't use my glass bin but rate payers are paying for it!
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	Opt-in option only!
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	No
Are there any comments you'd like to make?	Not at the expense of rate payers, unless free compost is available afterward
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	No
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	Do not add expense to ratepayers unless all product is composted and free for households to take back for their gardens

### Submission on the draft Waste Management & Minimisation Plan

Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	We compost. We have an insinkerator. We still have leftover green waste.
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	
What target should we set instead?	
Question 4: Other comments	
	I see businesses and schools, as well as friends households, struggle to correctly disposable of food and green waste. This would help stop it mixing in general waste, reduce landfill and help break it down correctly.

### Submission on the draft Waste Management & Minimisation Plan

Your contact details	
First name	Bridget
Last name	Campbell
Organisation you represent	
Hearing	
Do you want to speak to Council in support of your submission?	No
Question 1: Food scraps and green waste	
Do you support our plan to introduce a food scraps kerbside collection service?	Yes
Are there any comments you'd like to make?	I would be interested in what bins or bags you would use - if it's too gross it might put people off
What should be included in the kerbside collection service?	Food scraps and green waste
Please tell us your thoughts	I have a residential section and 2 compost bins that I use for all good scraps and green waste but even then getting rid of sticks, branches, or green waste that doesn't compost well is a pain - I would use this for things that don't compost easily or for weeds that I don't want to put in the compost
Question 2: Review of services	
Do you support our plan to investigate different ways of delivering kerbside collection services?	Yes
Are there any comments you'd like to make?	Kerbside collection is already so expensive - council bins are very pricey which encourages illegal dumping etc. It would be good to see something more affordable
Question 3: Waste minimisation target	
Do you support our plan to include these performance standards as our waste minimisation target?	Yes
Are there any comments you'd like to make?	I think businesses need to take more accountability for the waste they produce (I.e construction industry, and importers who bring single use materials into the country). Proposal individual solutions for system issues is never going to be effective
What target should we set instead?	
Question 4: Other comments	
	Great that this is being looked at, humans behavior is difficult to tackle and people don't like change, but they also forget very quickly, so if you implement change even if it's not well received people will get over it
