

Parking Framework Workshop

12 February 2025

Workshop Outline

- Parking Framework Recap
- Discussion on Parking Framework content
- Discussion on moving forward

Parking Framework Recap

- Parking Framework meant to be a city-wide strategic document linking parking management practice to city vision and goals
- Parking Management Plans meant to be area-specific plans for managing parking and addressing existing issues, ie City Centre or the Hospital
- 20 November Economic Growth Committee Officers presented a draft parking framework to go to consultation.
- At the same meeting an alternative parking framework was presented by Councillor Wood.
- A Procedural Motion was raised to lie the motion on the table until a workshop was undertaken in which the alternative could be discussed.

Parking Framework Differences

- Move away from integrating parking management with wider planning
- Move to focus on providing supply rather than looking at both supply and demand of parking management
- Retention of Residential Parking Permits
- Increases council responsibility in providing parking for residential dwellings
- Less alignment with PNCC strategies and plans
